

v3n0m-Scanner

<https://github.com/v3n0m-Scanner/V3n0M-Scanner>

-One of the best scrapers. Comes with 18k dorks but i just change it with my own online shop hunting dorks use Note++ or any text editor to change dork list "d0rks"..

- Run v3n0m
- 1 **ENTER**
- .com, .net, .jp, .kr etc... (Domain = Site:) **ENTER**
- 0 Enter
- 3 to 7 **ENTER** (best not go over 7 threads from my experience)
- 1 to 3 **ENTER** (best not go over 3 pages from my experience, but up to 5 is ok as well)

The dorks ive collected over time, for shopping 😊 Just replace it with the original file

SQLi Dumper 7

<http://rghost.net/76JTMsWVI>

-Best all round dork scraper, proxy scraper/checker and automated injection tool.

- left side boxes **inurl: allinurl: or intext: etc.. only 1,**
- Middle big box copy paste DORKS,
- right side boxes **site: JP KR NZ AU (Country code or Domain) .net .org .biz .net.au .co.jp etc...** again only 1
- Click start wait till you get the amount you want and hit cancel or import saved list from v3n0m.
- Go to Exploit Tab and Click Analyze or Start or whatever it is and wait for it to end
- Go to Injectable tab and repeat Click Analyze or Start
- Once finished right click "go to dumper"

JSQL Injection v0.6.0

<https://github.com/ron190/jsql-injection/releases>

-One of the best automated injecting tool.

- Copy paste Exploitable/Vulnerable link and click arrow and profit
